

Himtf.com, the site is renewed and becomes more functional and usable by Operators and Issuers

We announce the launch of a new website that provides further information about financial
instruments and new services for users and introduces the new name of our market segments, MiM.

On 2 June 2018 Hi-mtf Sim S.p.A. launches a new website.

With the launch of a new site, Hi-Mtf has completely renewed Himtf.com (.it / .eu) creating a graphically modern and intuitive web page.

The new homepage is focused on the different market segments and its restructuring is specially designed for Operators, Issuers and Retail Customers for a easy navigation.

MiM - Multilateral italian Market: an easy acronym to remember. The new name that is attributed to all the market segments managed by Hi-mtf is MiM (**Mercato Italiano Multilaterale**).

New features - In the foreground, the new website shows all the market segments, each containing a single class of financial instrument (e.g. MIM Azioni for equity instruments). Moreover, we have outfitted the homepage with a new facilitated tool that allows users to search easily financial instruments.

A reserved area dedicated to operators has been added, exploiting the potential of the web 2.0, where it is possible to find the documentation related to the Market technical specifications.

A new organization of the News section has been introduced and this allows a simpler and more immediate search for information.

The site also guarantees full compatibility with all types of computers, tablets and smartphones

New Information in 'MiM Azioni' Section - Himtf.com becomes a point of reference for retail investors who access autonomously to up-to-date information about the shares they are interested in, without the assistance of their brokers.

In relation to shares listed on MIM Azioni, a new set of information has been implemented and now it includes: aggregated data related to the current Observation Period and detailed data related to the current Interim Observation Period, the achieved percentage of significance thresholds and financial information regarding the issuer.
